

000-081 IBM System x IBM System x Technical Principles V9

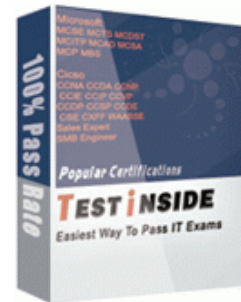

Practice Exam: 000-081 Exams

Exam Number/Code: 000-081

Exam Name: System x Technical Principles V9

Questions and Answers: 72 Q&As

([IBM System x](#))

Exam : [000-081](#)

"System x Technical Principles V9", also known as 000-081 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 72 Q&As to your 000-081

Exam preparation. In the 000-081 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the 000-081 Exam TestInside Practice Exams for IBM **IBM System x** Certification 000-081 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-081 Exam.

000-081 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the IBM System x product experts, included the current newest 000-081 examination questions.

3. 100% Guarantee to Pass Your IBM System x exam and get your IBM System x Certification.

If you do not pass the IBM Certification 000-081 exam (System x Technical Principles V9) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 000-081 Q&A ensure you pass the exam at your first try.

TestInside professional provide IBM System x 000-081 the newest Q&A, completely covers 000-081 test original topic. With our complete IBM System x resources, you will minimize your IBM System x cost and be ready to pass your 000-081 tests on Your First Try, 100% Money Back Guarantee included!

[IBM 000-081](#) Test belongs to one of the IBM System x certified test, if needs to obtain the IBM System x certificate, you also need to participate in other related test, the details you may visit the [IBM System x](#) certified topic, in there, you will see all related IBM System x certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 000-081 exam

000-081 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-081 exam questions updated on regular basis

Same type as the certification exams, 000-081 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-081 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : IBM 000-081

Title : System x Technical Principles V9

1. A customer has an IBM BladeCenter E with ten HS22 Blade servers installed. Currently only one Ethernet port is available for each server.

What is required to enable the second port on each server?

- A. Fibre Channel Switch Module
- B. Gb Ethernet expansion card
- C. Myrinet Cluster expansion card
- D. Ethernet Switch Module

Answer: D

2. A retail customer wants to identify the system BIOS version information on several IBM System x servers and apply updates as required from a central location without causing server downtime.

Which IBM tool provides this capability?

- A. Access Connector
- B. ServerGuide
- C. Systems Director
- D. Remote Deployment Manager

Answer: C

3. A small manufacturing customer has purchased a DS4800 and wants to buy a drive expansion cabinet. The customer wants to support SATA and FC drives in the same expansion cabinet.

Which expansion cabinet supports the customer's requirements?

- A. EXP420
- B. EXP810
- C. EXP710
- D. EXP100

Answer: B

4. A manufacturing customer wants a consolidation solution that provides scale-out capability and the highest processor density per rack unit.

Which solution meets the customer requirements?

- A. IBM System x3950 M2 with Microsoft Virtual Server
- B. BladeCenter with IBM Systems Director
- C. IBM System x3950 M2 with VMware
- D. BladeCenter with VMware

Answer: D

5. What is used in an IBM BladeCenter to provide cooling?

- A. Fans for each blade
- B. Chilled water
- C. Blowers
- D. Freon

Answer: C

6. Which IBM Systems Director task will give you the ability to update BIOS and device drivers on System x servers?

- A. Update Manager
- B. Tivoli Provisioning Manager
- C. Server Configuration Manager
- D. External Application Launch

Answer: A

7. A customer is concerned about their newly purchased System x server's response time. The installed application is CPU intensive.

Which IBM tool should the customer use to identify potential bottlenecks?

- A. UpdateXpress
- B. Capacity Manager
- C. ServerGuide
- D. System Availability

Answer: B

8. A retail customer has just installed an IBM option into their server, but the option is not working properly.

Which of the following should be checked to determine if the device is supported in the server?

- A. IBM ServerProven site
- B. IBM Options Support Site
- C. Hardware Compatibility List (HCL)
- D. Configuration and Options Guide (COG) ?Compatibility list

Answer: A

9. If a System x server does not boot when the Power button is pressed, and the server emits one beep followed by two beeps in succession and then another single beep.

Which source should you use to identify the meaning of these indicators?

- A. IBM Server Users Manual
- B. ServerGuide Hardware Reference
- C. Problem Determination and Service Guide
- D. BIOS Error Logs

Answer: C

10. A retail customer requests an explanation of ProteXion.

Which of the following describes IBM Memory ProteXion?

- A. Memory ProteXion is the way memory is divided in two ports, one port being mirrored to the other half.
- B. Memory ProteXion is the process whereby a person can replace failed DIMMs of the same type, size, and clock speed without turning off the server.
- C. Memory ProteXion is the technology that uses redundant bit steering and provides DIMM/data protection in the event of a DIMM failure.
- D. Memory ProteXion is an automatic daily test of all the system memory that detects and reports developing memory errors before they cause a server outage

Answer: C
