

000-102 IBM certifications I

IBM High Availability for AIX - Technical Support and Administration

Practice Exam: 000-102 Exams

Exam Number/Code: 000-102

Exam Name: High Availability for AIX - Technical Support and Administration

Questions and Answers: 81 Q&As

([IBM certifications I](#))

Exam : [000-102](#)

"High Availability for AIX - Technical Support and Administration", also known as 000-102 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 81 Q&As to your 000-102 Exam preparation. In the 000-102 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the 000-102 Exam TestInside Practice Exams for IBM **IBM certifications I** Certification 000-102 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-102 Exam.

000-102 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the IBM certifications I product experts, included the current newest 000-102 examination questions.

3. 100% Guarantee to Pass Your IBM certifications I exam and get your IBM certifications I Certification.

If you do not pass the IBM Certification 000-102 exam (High Availability for AIX - Technical Support and Administration) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 000-102 Q&A ensure you pass the exam at your first try.

TestInside professional provide IBM certifications I 000-102 the newest Q&A, completely covers 000-102 test original topic. With our complete IBM certifications I resources, you will minimize your IBM certifications I cost and be ready to pass your 000-102 tests on Your First Try, 100% Money Back Guarantee included!

[IBM 000-102](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I certificate, you also need to participate in other related test, the details you may visit the [IBM certifications I](#) certified topic, in there, you will see all related IBM certifications I certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 000-102 exam

000-102 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-102 exam questions updated on regular basis

Same type as the certification exams, 000-102 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-102 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : IBM 000-102

Title : High Availability for AIX - Technical Support and Administration

1. When using IPAT via Aliasing, what is the default distribution preference for the placement of the service IP labels?

- A. Collocation
- B. Anti-Collocation
- C. Collocation with persistent
- D. Anti-Collocation with persistent

Answer: B

2. An administrator wants to install Web SMIT on a node that is not part of a cluster. Which PowerHA fileset provides this function?

- A. cluster.sysmgt.wsm
- B. cluster.es.client.wsm
- C. cluster.es.server.websm
- D. cluster.sysmgt.websm.rte

Answer: B

3. When does the Online Planning Worksheet tool run a validation?

- A. When loading and activating a definition file into an inactive cluster
- B. When exporting a definition to a cluster node or saving a definition file
- C. When importing a definition from an active cluster or saving a definition file
- D. When loading a definition into an active cluster or synchronizing a definition file

Answer: C

4. An administrator wants to use the online planning worksheets as an aid to configuring a PowerHA cluster. Which PowerHA fileset would the administrator need to install in order to obtain this tool?

- A. cluster.es.haw
- B. cluster.es.worksheets
- C. cluster.es.tools.worksheets
- D. cluster.es.server.worksheets

Answer: B

5. What is the maximum number of nodes that can be configured in a single PowerHA cluster?

- A. 16
- B. 32
- C. 64
- D. 128

Answer: B

6. A customer has a resource group rg1 configured on a two node cluster with the following policies:
The customer has observed the following scenarios as nodes join the cluster during cluster start up.

Scenario 1

Node1 joins cluster as first node - rg1 is acquired by Node1

Node2 joins cluster as second node - rg1 is moved from Node1 to Node2

Scenario 2

Node2 joins cluster as first node - rg1 is acquired by Node2

Node1 joins cluster as second node - rg1 remains on Node2

Which of the following is the reason for this behavior?

- A. rg1 is configured with a delayed fallback timer
- B. Settling time policy has not been configured for rg1
- C. Node1 does not have sufficient resources to support rg1
- D. Node2 is the first in the 'Default Node Priority' list for resource group rg1

Answer: D

7. A customer is interested in using two Power 550 servers to implement a new two node cluster. The cluster will be using SAN attached disk for shared storage and will be attached to one IP network.

Which of the following adapter configurations will meet the customer requirements while reducing single points of failure?

- A. One dual-port fibre channel adapterOne dual-port Ethernet adapterSingle SAS backplane for mirrored rootvg
- B. Two single-port fibre channel adaptersOne dual-port Ethernet adapterSplit SAS backplane for mirrored rootvg
- C. Two single-port fibre channel adaptersOne single-port Ethernet adapterOne integrated Ethernet adapterSAN attached storage for mirrored rootvg
- D. Two single-port fibre channel adaptersOne single-port Ethernet adapterOne integrated Ethernet adapterSingle SAS backplane for mirrored rootvg

Answer: C

8. A customer has a requirement to build a 4 node cluster. Disk heartbeating will be used as the non-IP network.

What is the maximum number of disk heartbeat point-to-point links one would need to implement in order to achieve the highest level of availability?

- A. 4
- B. 6
- C. 8
- D. 12

Answer: B

9. An administrator is configuring an application monitor. Upon encountering an unrecoverable error the administrator does not want the resource group to failover.

How can the application monitor be configured to achieve this?

- A. Configure the application monitor with a restart count of 0
- B. Configure the application monitor with a monitor mode of Notify
- C. Configure the application monitor with a notify method of Monitor
- D. Configure the application monitor with a failure action of Notify

Answer: D

10. A customer is planning a PowerHA cluster split across two sites.

The sites are located 10km apart. There is a DS8000 storage array at each site with SAN connectivity between the two arrays. There are only enough IP interfaces for one IP network in this cluster.

How can they ensure that disk data is automatically mirrored and synchronized between sites?

- A. Purchase PowerHA/XD license
- B. Purchase PowerHA with GLVM license
- C. Implement PowerHA with split-site LVM
- D. Implement PowerHA with cross-site LVM

Answer: D
