

## 000-399 IBM certifications II

### IBM Test399.IBM WebSphere Portal V5.1 Application Development

**Practice Exam:** 000-399 Exams

**Exam Number/Code:** 000-399

**Exam Name:** Test399.IBM WebSphere Portal V5.1 Application Development

**Questions and Answers:** 102 Q&As

( [IBM certifications II](#) )

Exam : [000-399](#)

"Test399.IBM WebSphere Portal V5.1 Application Development", also known as 000-399 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 102 Q&As to your 000-399 Exam preparation. In the 000-399 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the 000-399 Exam TestInside Practice Exams for IBM **IBM certifications II** Certification 000-399 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

#### **TestInside provide the professional Q&A.**

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-399 Exam.

000-399 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the IBM certifications II product experts, included the current newest 000-399 examination questions.

3. 100% Guarantee to Pass Your IBM certifications II exam and get your IBM certifications II Certification.

If you do not pass the IBM Certification 000-399 exam (Test399.IBM WebSphere Portal V5.1 Application Development) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

#### **use TestInside 000-399 Q&A ensure you pass the exam at your first try.**

TestInside professional provide IBM certifications II 000-399 the newest Q&A, completely covers 000-399 test original topic. With our complete IBM certifications II resources, you will minimize your IBM certifications II cost and be ready to pass your 000-399 tests on Your First Try, 100% Money Back Guarantee included!

[IBM 000-399](#) Test belongs to one of the IBM certifications II certified test, if needs to obtain the IBM certifications II certificate, you also need to participate in other related test, the details you may visit the [IBM certifications II](#) certified topic, in there, you will see all related IBM certifications II certified subject of examination.

#### **TestInside Testing Engine Features**

Comprehensive questions and answers about 000-399 exam

000-399 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-399 exam questions updated on regular basis

Same type as the certification exams, 000-399 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-399 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : IBM 000-399

Title : Test399.IBM WebSphere Portal V5.1 Application Development

1. Which of the following troubleshooting actions should be taken when the WebSphere Portal Test environment fails to start on a Windows environment?

- A. In the server configuration, uncheck the "Enable hot method replace in debug mode" checkbox.
- B. Login to Windows as an administrator and run the WebSphere Portal Test environment.
- C. Check the install logs located at WebSpherePortalServerlogswpsinstalllog.txt.
- D. Check the install logs located at WebSphereAppServerlogsruntimeportal\_v50logwpsinstalllog.txt.

Answer: B

2. In which phase are the Struts Actions triggered within the Portal Struts Framework?

- A. processAction
- B. render
- C. doDispatch
- D. doView

Answer: A

3. What type of object is returned from the JNDI lookup when accessing a portlet service?

- A. PortletService
- B. PortletServiceProvider
- C. PortletServiceHome
- D. PortletServiceFactory

Answer: C

4. In the Web Services Description Language (WSDL) for a target cooperative portlet, what is the role of declared output parameters associated with a portlet action?

- A. They correspond to properties that should be propagated to other portlets via the Property Broker.
- B. They correspond to additional target endpoints available in the wiring tool.
- C. They represent return values for the delivered action.
- D. In the current cooperative portlet framework, action output parameters are ignored.

Answer: A

5. Rational Application Developer Portal Tools provides which of the following features for debugging a portlet on a remote server?

- A. WebSphere Administrative Console
- B. WebSphere Portal V5.1 Remote Server Deploy
- C. WebSphere Portal V5.1 Server Attach
- D. WebSphere Portal V5.1 Test Environment

Answer: C

6. For a development environment running on the Windows operating system, which software would be required to successfully build, test and install a portlet application on WebSphere Portal V5.1?

- A. Portal Toolkit
- B. Rational Application Developer

- C. IBM WebSphere Business Integrator Modeler
- D. IBM WebSphere Business Integration Server Foundation

Answer: B

7. Which of the following types of credentials allows a portlet to extract a single secret?

- A. SimplePassiveCredential
- B. UserPasswordPassiveCredential
- C. BinaryCredential
- D. JaasSubjectCredential

Answer: A

8. A developer is using the WebSphere Portal V5.1 Test Environment and notices that a JSR 168 portlet title needs to be changed. A portlet information resource bundle is NOT defined in the deployment descriptor. The title is updated in the deployment descriptor and the portlet is re-tested, but the title change is not displayed. What needs to be done to display this change?

- A. A resource bundle needs to be defined in the portlet.xml and contain the portlet title.
- B. The portlet title needs to be updated in the web.xml and the WebSphere Portal V5.1 Test Environment needs to be restarted.
- C. The developer needs to make certain that the property reloadingEnabled is set to true in the ibm-web-ext.xmi file.
- D. The developer needs to make certain that the WebSphere Portal V5.1 Test Environment is restarted.

Answer: D

9. Which of the following statements is valid with respect to debugging using Rational Application Developer?

- A. Personalized portlet applications can only be tested remotely.
- B. Debugging allows developers to set breakpoints in the Java source code but not JSP files.
- C. Debugging requires that the Rational Agent Controller be installed and running.
- D. Multiple clients can concurrently debug using the same remote WebSphere Portal server.

Answer: A

10. A JSF managed bean is bound to an SDO (Service Data Objects)? What is the effect of changes made by an end user to the corresponding values in the UI component(s)?

- A. The update may be persisted through the SDO mediator by application code during the Invoke Application JSF request phase.
- B. The update is persisted through the SDO mediator automatically during the Invoke Application JSF request phase.
- C. The update is persisted through the SDO mediator automatically during the Update Model Values JSF request phase.
- D. The update is persisted through the SDO mediator automatically during the Apply Request Values JSF request phase.

Answer: C

11. Which of the following is considered a BEST practice for accessing a datasource from a portlet application?

- A. Use a portlet service or a connection framework to provide access to the datasource.
- B. A portlet should only consider accessing a datasource during the render phase.
- C. A portlet should only consider accessing a datasource during the processAction phase.
- D. Whenever a portlet is accessing a datasource, portlet caching should be enabled.

Answer: A

12. When the WebSphere Portal V5.1 Test Environment server fails on startup on a Windows environment, which file location would be the MOST likely file to have information useful to a developer? Assume that all defaults were taken for product installation locations.

- A. PortalToolkitruntimeportal\_v51log
- B. Portal51UTEPortalServerlog
- C. runtimesportal\_v50log

D. Rationalportal\_v50log

Answer: C

13. For portal business processes that should be processed within portal, what is used to lookup the task page definition at runtime?

- A. Client UI identifier
- B. Process Template Name
- C. Task instance object identifier (TKIID)
- D. Staff activity identifier

Answer: A

14. Which of the following is valid about portlet testing in a development environment?

- A. Portal Test Environment with WebSphere Portal V5.1 installs complete WebSphere Portal code for testing portlets.
- B. Portlet Toolkit supports testing against WebSphere Portal V5.1, WebSphere Portal V 5.0.2.2 and WebSphere Portal V 5.0.2.
- C. When defining a remote (server attach) server for testing, debugging, or profiling a portlet project, the server must be created and configured.
- D. Remote Server attach configurations do not support auto deployments of Portlets from Rational Application Developer V6.0.

Answer: C

15. When a Data Transfer Object is obtained in the action processing phase of a portlet action, what is the BEST scope to use to deliver this object to the portlet's render phase?

- A. Render parameter
- B. Request attribute
- C. Portlet session
- D. Portlet preference

Answer: A

16. The Personalization resource wizard in Rational Application Developer is used to generate the content spot classes and resource collection classes. If the content spot and resource collection will be used by multiple applications, then those classes should be:

- A. Deployed together with the related portlets in the portlet application WAR file.
- B. Placed in the WebSphere Application Server shared library.
- C. Placed directly in the pzn\_root/pzn/v5.1/lib directory.
- D. Uploaded using the Personalization interface.

Answer: B

17. By default, for JSR 168 portlets, the Property Broker is expecting the action name to be delivered via a parameter named which of the following, if named at all?

- A. The value of the required actionParamName property.
- B. The fully qualified type of the property being sent.
- C. com.ibm.portal.propertybroker.action
- D. No action name is associated with JSR 168 portlets.

Answer: C

18. To create a custom portlet service, which of the following options list all of the REQUIRED steps?

- A. Define the interface, write the implementation, register the service, deploy the service jar to <WPS\_HOME>/shared/app.
- B. Define the interface, write the implementation, register the service, deploy the service home jar to <WPS\_HOME>/shared/app/config/services.
- C. Define the interface, write the implementation, deploy the service home jar to

<WPS\_HOME>/shared/app/config/services.

D. Write the implementation, register the service.

Answer: A

19. For a web application with multiple Struts portlets, the BEST way to define the initial views of the individual portlets is to specify them:

A. In the welcome file list in the application's web.xml.

B. In the viewMode.page preferences attributes in the individual portlet.xml.

C. As viewMode properties in the actions section in the individual struts-config.xml.

D. As view attributes in the supports section of the individual portlet.xml.

Answer: B

20. What type of credential slot would a developer choose in order to share the credential secret amongst all users and portlets?

A. Public Credential

B. Shared Credential

C. System Credential

D. Global Credential

Answer: C
