Exam : IBM 000-853

Title : Websphere for Iseries Solution Sales v5r3

1. An iSeries customer will be installing WebSphere Application Server (WAS) Version 5 on an eServer i5 520. Which of the following skills are important when installing and configuring WAS?

- A. SQL programming
- B. TCP/IP configuration
- C. iSeries backup and recovery
- D. Java programming

Answer: B

2. A customer would like for employees to be able to access iSeries applications and the OS/400 command line within a browser. They require that this be done without changing source code and with no development effort. Which of the following solutions meets these requirements?

- A. PCOMM
- B. HATS LE
- C. Host Publisher
- D. IBM WebFacing Tool

Answer: B

3. A customer has recently purchased a new i825 3-way Enterprise Edition server that is using iSeries logical partitioning (LPAR). They are running WAS - Express in a one-processor partition. They would like to run WAS - Express on another 1.5 processor partition on the i82. How many additional WAS processor licenses must they purchase?

- A. 0
- B. 1
- C. 1.5
- D. 2

Answer: A

4. A company's workforce is frustrated by the complexity of finding Human Resource (HR) policies and business performance information. Which of the following solutions would allow users to more easily find their information?

- A. WebSphere Host Integration Solution
- B. WebSphere Commerce - Express
- C. WebSphere Business Integration Connect - Express
- D. WebSphere Portal - Express

Answer: D

5. A customer wants to provide access to applications they have deployed to the web so that each end user can personalize to their own preferences. Which of the following approaches will best fulfill that need?

- A. Use HATS to reface the applications so the end users can see them via the browser.
- B. Use Lotus Instant Messaging and Web Conferencing and Lotus Team Workplace to allow the end users to collaborate with one another as they see fit.
- C. Use WebSphere Portal - Express to provide the interface for existing applications and add additional function.
- D. Install WebSphere Application Server Network Deployment and use its clustering feature to make the applications available.

Answer: C

6. Which of the following provides access to personalized enterprise resources such as enterprise applications, corporate specific content, and collaborative environments?

- A. Lotus Workplace Collaborative Learning
- B. HATS
- C. WebSphere Portal - Express
- D. DB2 Content Manager - Express

Answer: C

7. A customer with an i270 processor FC# 2248 is using the IBM HTTP Server (powered by Apache) including Tomcat supplied with OS/400. Which of the following products is supported in this environment to access iSeries resources?

- A. HATS
- B. IBM WebFacing Tool
- C. WebSphere Host Publisher
- D. iSeries Access for Web

Answer: D

8. A customer wants to reface their existing order entry application when they add capacity to their i840. They currently own WebSphere Development Studio and are considering using either Seagull Blue Zone or Advanced BusinessLink GUIStyle for the reface. Which of the following reasons would cause them to consider the tools in WDS?

- A. Both of the partner products require a Java Application Server.
- B. WDS is an IBM product.
- C. The IBM WebFacing Tool eliminates the interactive workload for the application.
- D. The IBM WebFacing Tool is included in WDS at no charge.

Answer: D

9. An iSeries customer would like a better understanding of WebSphere. Which of the following customer needs does WAS address?

- A. Integrating CODE/400 with J2EE
- B. Presenting business applications on the Web
- C. Redesigning line of business applications for the Web
- D. Developing integrated Java applications for line of business applications

Answer: B

10. A customer wants to acquire a portal solution that includes collaboration and virtual team room. Which of the following products would meet these requirements?

- A. WebSphere Portal Enable
- B. WebSphere Portal - Express
- C. WebSphere Portal - Express Plus
- D. WebSphere Portal and Exchange Collaboration Engine

Answer: C

11. A customer has both iSeries and zSeries systems in a network. They want to quickly reface all host RPG and COBOL applications and enable end users to run these applications from a browser. Which of the following products would work for both of their iSeries and zSeries environments?

- A. WebSphere Commerce
- B. iSeries Access for Web
- C. Host Access Transformation Services
- D. IBM WebFacing Tool

Answer: C

12. When implementing e-business within an enterprise, which of the following would be the most advanced stage of adoption for an iSeries WebSphere customer?

- A. Integrating Web solutions internally
- B. Basic Web transactions
- C. Publishing Web content
- D. Integrating Web solutions externally

Answer: D

13. An iSeries customer wants to add a GUI to selected RPG applications today and integrate these RPG applications with their customers' and suppliers' applications using Web Services in the future. Which of the following approaches should they take to achieve these two goals?

- A. Use iSeries Access now and use the IBM WebFacing Tool in the future.
- B. Use WebSphere Host Integration Solution now and WebSphere Host Access Transformation Services in the future.
- C. Use the IBM WebFacing Tool now and then modularize the RPG application and use web services wizard in the future.
- D. Modularize the RPG applications with HATS LE now and WebSphere Portal Enable in the future.

Answer: C

14. Which of the following is a unique advantage for the iSeries version of WAS - Express?

- A. It includes a Java Message Service (JMS) provider.
- B. It has a graphical wizard for configuration of an instance on the iSeries.
- C. It supports any J2EE 1.3 enabled application, including Enterprise Java Beans.
- D. It includes a copy of the WebSphere Studio Enterprise Developer, in addition to the server.

Answer: B

15. An iSeries customer wants a single sign-on and single point of access on the Web for several business applications. Which of the following products support this personalized interface for their end users?

- A. Enterprise Identity Mapping (EIM)
- B. Lightweight Directory Access Protocol (LDAP)
- C. Tivoli Access Manager for Operating Systems
- D. WebSphere Portal Enable for iSeries

Answer: D
