Exam : Oracle 1Z0-218

Title : PeopleSoft HRMS Fundamentals

1. Your client has North American Payroll and Global Payroll. When adding an employment instance for a new hire, your client selects a payroll system to use for processing the employee's payroll. Depending on which payroll system is selected, the input field names displayed would differ on the Payroll page except for two field names.

Identify the two field names that are displayed on the Payroll page for both payroll systems. (Choose two.)

- A. Paygroup
- B. GL Pay Type
- C. Eligibility Group
- D. Employee Type
- E. Holiday Schedule
- F. Exchange Rate Type

Answer: AE

2. Your organization has decided to implement row-level security. You suggested securing data by associating the company with people having jobs. This method of securing data is known as _____.

- A. Access Type / Role
- B. Permission List / Role
- C. Security set / Access Type
- D. Security set / Permission List
- E. Permission List / User Profile
- F. Access Type / Permission List

Answer: C

3. On the Job Data Work Location tab for a new hire, Company is a required field.

You can default Company from the _____ table.

- A. Location
- B. Job Code
- C. Position Data
- D. Business Unit
- E. Holiday Schedule

Answer: C

4. Which three fields default from the Department table to the employee job data level? (Choose three.)

- A. Grade
- B. Location
- C. Company
- D. Pay Group
- E. Business Unit
- F. Supervisor ID
- G. Employee Type

Answer: BCF

5. Which default value do the Job Code table and Location table have in common?

- A. Salary Plan
- B. Work Period
- C. Tax Location
- D. Standard Hours
- E. Establishment ID

Answer: A

6. Which PeopleSoft table do you use to identify a group of employees who share common pay characteristics?

- A. Job Code Table
- B. Company Table
- C. Pay Group Table
- D. Salary Plan Table
- E. Salary Grade Tables
- F. Comp Rate Code Table

Answer: C

7. Your client is implementing PeopleSoft HRMS system with Payroll Interface. The client is to start configuring Pay Group table.

What table value should exist in the system before configuring Pay Groups?

- A. Location
- B. Company
- C. Salary Plan
- D. Salary Step
- E. Salary Grade
- F. Additional Pay

Answer: B

8. Which three statements describe the benefits of using tableset sharing in the PeopleSoft system? (Choose three.)

- A. Tableset sharing uses SetID to restrict or grant access to data within a table.
- B. Tableset sharing allows organizations to track and report business information.
- C. Tableset sharing enables organizations to group rows of data within a control table by using a high-level key called a SetID.
- D. Tableset sharing uses Department ID in conjunction with department security tree to restrict or grant access to data within a table.
- E. Tableset sharing enables organizations to utilize indexing capabilities on mapped records for faster search results on employee data.
- F. Tableset sharing enables organizations to share information instead of entering it multiple times, when large portions of data are the same for various business units.

Answer: ACF

9. Adam is entering new hire information in the PeopleSoft system. Adam enters the new hire personal information and creates the organizational relationship of the new hire as EMPLOYEE. After Adam establishes the new hire's relationship with the organization, the system opens the JOB DATA page for Adam to enter the new hires job-related information.

Adam decides to complete the new hires job-related information after his lunch break and cancels out of the JOB DATA page.

What must be Adam's approach to successfully complete the new hire's job-related information in the PeopleSoft system after his break?

- A. Enter job-related information using Job Data component.
- B. Complete both personal information and job information at the same time.
- C. Enter job-related information using the Add Employment Instance component.
- D. Run SJT refresh process first and then enter job-related information using Job Data component.

E. Run SJT refresh process first and then enter job-related information using the Add Employment Instance component.

Answer: C

10. View the Exhibits.

Your client wants to set up a new department called ABC Headquarter for their newly acquired company ABC. The client shares the department and location information cross all business units.

The HR Administrator has checked that the location code ABCHQ showed up under the Location Table Search Result page under SetID "Share". However, when she tried to attach this location code to the new department she is trying to create, she got the error message.

Which two setups may have caused the error message to be displayed? (Choose two.)

- A. The Location SetID may not be valid for this department.
- B. The Department may have an earlier Effective Date than the Location.
- C. The Location and the Department may not belong to the same Business Unit.
- D. The Location may have been inactivated before the Department's Effective Date.
- E. The Location may not be associated with the proper company that the department is attached to.
- F. The TableSet Control table may not be set up correctly for the Record_Group Location and the Record_Group Department.

Answer: BD

11. What should you do when system performance is affected and you no longer want to maintain all employee records on the Job table?

- A. Purge employee data from the system.
- B. Use PeopleCode to hide data on the Job Data page.
- C. Access the Job Data page in Correct History mode and change the status to Inactive.
- D. Insert a new effective dated row on the Job Data page and change the status to Inactive.
- E. Change the description field on the Job Data page to state that this row is no longer active.

Answer: A
