

642-577 Wireless LAN

Cisco Wireless LAN Wireless LAN for System Engineers (WLANSE)

Practice Exam: 642-577 Exams

Exam Number/Code: 642-577

Exam Name: Wireless LAN Wireless LAN for System Engineers (WLANSE)

Questions and Answers: 110 Q&As

([Wireless LAN](#))

Exam : [642-577](#)

"Wireless LAN Wireless LAN for System Engineers (WLANSE)", also known as 642-577 exam, is a Cisco certification. With the complete collection of questions and answers, TestInside has assembled to take you through 110 Q&As to your 642-577 Exam preparation. In the 642-577 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Quality and Value for the 642-577 Exam TestInside Practice Exams for Cisco **Wireless LAN** Certification 642-577 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 642-577 Exam.

642-577 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Wireless LAN product experts, included the current newest 642-577 examination questions.

3. 100% Guarantee to Pass Your Wireless LAN exam and get your Wireless LAN Certification.

If you do not pass the Cisco Certification 642-577 exam (Wireless LAN Wireless LAN for System Engineers (WLANSE)) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 642-577 Q&A ensure you pass the exam at your first try.

TestInside professional provide Wireless LAN 642-577 the newest Q&A, completely covers 642-577 test original topic. With our complete Wireless LAN resources, you will minimize your Wireless LAN cost and be ready to pass your 642-577 tests on Your First Try, 100% Money Back Guarantee included!

[Cisco 642-577](#) Test belongs to one of the Wireless LAN certified test, if needs to obtain the Wireless LAN certificate, you also need to participate in other related test, the details you may visit the [Wireless LAN](#) certified topic, in there, you will see all related Wireless LAN certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 642-577 exam

642-577 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

642-577 exam questions updated on regular basis

Same type as the certification exams, 642-577 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 642-577 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Cisco 642-577

Title : Wireless LAN for System Engineers

1. The purpose of the 802.11g protection mechanism is to allow _____.

- A. 802.11g clients to roam to 802.11b APs
- B. 802.11b client cards to transmit at 802.11g data rates
- C. the transmit power of an 802.11g AP to be set at 30 mW
- D. 802.11b client cards to transmit in the same cell with 802.11g clients without collisions

Answer: D

2. The WLSE Cisco Aironet Conversion Tool allows the administrator to _____.

- A. store base AP configuration
- B. convert VxWorks APs to IOS
- C. store base client configuration
- D. convert APs to either VxWorks or IOS

Answer: B

3. What should you do before you perform a site survey? (Choose three.)

- A. get map of building infrastructure
- B. find out how many users and what kind of applications are used
- C. use antenna radiation plot to predict maximum Access Point coverage
- D. select what kind of Access Point and antenna meet the customer needs

Answer: ABD

4. In the U.S., no licensing is required for which four RF bands? (Choose four.)

- A. 902-928 MHz
- B. 800-820 MHz
- C. 2.400-2.483 GHz
- D. 2.500-2.600 GHz
- E. 5.150-5.350 GHz
- F. 5.725-5.825 GHz

Answer: ACEF

5. What are three components of WPA (Version 1)? (Choose three.)

- A. LEAP
- B. 48-bit IV
- C. 802.1X authentication
- D. 256-bit AES encryption cipher
- E. per-packet keying and Message Integrity Check

Answer: BCE

6. Which two benefits does server-based authentication offer over standard WEP? (Choose two.)

- A. It uses TACACS for authentication.
- B. It uses dynamic session-based keys.
- C. Authentication is based upon user name and password.

D. It keeps the WEP keys the same for all users for ease of use.

Answer: BC

7. A community wants to give officers access to the station house's server when they are on the road to view police records, which could help avert potential deadly and threatening individuals. The design has several bridges distributed throughout the city to provide coverage in every area of the city. What antenna would be most appropriate on the police cruiser?

- A. an omni-directional antenna
- B. a directional antenna (Yagi)
- C. a directional antenna (patch)
- D. an isotropically designed antenna

Answer: A

8. What is the calculation formula for EIRP?

- A. Antenna gain - Transmitter Power + Cable Loss
- B. Transmitter Power + Antenna Gain - Cable Loss
- C. Cable Loss + Antenna Gain - Receiver Sensitivity
- D. Cable Loss + Receiver Sensitivity + Antenna Gain

Answer: B

9. What is required to launch a dictionary attack against an EAP authentication algorithm?

- A. userid or login
- B. encryption key
- C. master session key
- D. RADIUS shared secret

Answer: A

10. What is the relationship between data rate and cell size (coverage area)?

- A. The highest data rate has the largest cell size.
- B. The lowest data rate has the smallest cell size.
- C. The highest data rate has the smallest cell size.
- D. Only the transmit power and antenna gain control the cell size not the data rate.

Answer: C

11. Location Manager is a component of which device's user interface?

- A. WLSE
- B. Cisco ACS Server
- C. Cisco Access Point
- D. Cisco Client Adapters

Answer: A

12. What is the purpose of the WPA 4-way handshake?

- A. authenticates users
- B. negotiates broadcast keys
- C. derives WPA unicast keys
- D. negotiates the encryption cipher types

Answer: C

13. Which statement about non-overlapping channels is true?

- A. Non-overlapping channels share the same frequencies to improve roaming.
- B. Non-overlapping channels use different frequency bands to improve roaming.
- C. Non-overlapping channels share the same frequencies but use different modulations to avoid interference.
- D. Non-overlapping channels use the same frequency band but use non-shared frequencies to avoid interference.

Answer: D

14. What is the minimum overlap in RF coverage that is needed to allow a repeater to associate to a root Access Point?

- A. 25%
- B. 50%
- C. 75%
- D. 100%

Answer: B

15. What is the angle of coverage that an antenna radiates?

- A. gain
- B. diversity
- C. bandwidth
- D. beamwidth
- E. Fresnel zone

Answer: D

16. The typical antenna for a root bridge in a multipoint deployment is a(n) _____.

- A. Yagi antenna
- B. Sector antenna
- C. Parabolic dish antenna
- D. Omni-directional antenna

Answer: D

17. A customer has a wireless link between two buildings using directional antennas. The installation was done in late November and was functioning well for a number of months. In April the link started to have problems. What are two likely causes for the problems? (Choose two.)

- A. A cell phone tower was placed near one of the locations.
- B. The connectors were not waterproofed and corrosion has built up in the cable.
- C. There are trees between the two buildings that are now just starting to bud with new leaves.
- D. The local power company has erected power lines that cross the line of sight of the bridge links.

Answer: BC

18. Local Authentication Service on the Cisco Access Point allows a maximum of how many users?

- A. 10
- B. 25
- C. 50
- D. 100

Answer: C

19. What are three benefits of using EAP/802.1X authentication for WLAN networks? (Choose three.)

- A. detects 802.11 radio interference
- B. detects Denial of Service (DOS) attacks on the WLAN network
- C. dynamically generates key material for encrypting data packets
- D. provides mutual authentication between the user and the network
- E. allows the IT administrator to implement user or user-group based policies (such as dynamic VLAN assignment)

Answer: CDE

20. A customer has a current site with an omni-directional antenna. It has 50 ft. of cabling that they are increasing to 100 ft. This change in cabling could _____.

- A. increase the data rate
- B. increase the coverage area

- C. decrease the coverage area
 - D. decrease the angle of radiation from the antenna
- Answer: C
