

920-160 NCSS

Nortel nncss-communication server(cs)1000 Rls.4.0 Hardware I&M

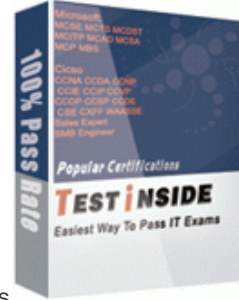

Practice Exam: 920-160 Exams

Exam Number/Code: 920-160

Exam Name: nncss-communication server(cs)1000 Rls.4.0 Hardware I&M

Questions and Answers: 53 Q&As

([NCSS](#))

Exam : [920-160](#)

"nncss-communication server(cs)1000 Rls.4.0 Hardware I&M", also known as 920-160 exam, is a Nortel certification. With the complete collection of questions and answers, TestInside has assembled to take you through 53 Q&As to your 920-160 Exam preparation. In the 920-160 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Quality and Value for the 920-160 Exam TestInside Practice Exams for Nortel **NCSS** Certification 920-160 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 920-160 Exam.

920-160 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the NCSS product experts, included the current newest 920-160 examination questions.

3. 100% Guarantee to Pass Your NCSS exam and get your NCSS Certification.

If you do not pass the Nortel Certification 920-160 exam (nncss-communication server(cs)1000 Rls.4.0 Hardware I&M) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 920-160 Q&A ensure you pass the exam at your first try.

TestInside professional provide NCSS 920-160 the newest Q&A, completely covers 920-160 test original topic. With our complete NCSS resources, you will minimize your NCSS cost and be ready to pass your 920-160 tests on Your First Try, 100% Money Back Guarantee included!

[Nortel 920-160](#) Test belongs to one of the NCSS certified test, if needs to obtain the NCSS certificate, you also need to participate in other related test, the details you may visit the [NCSS](#) certified topic, in there, you will see all related NCSS certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 920-160 exam

920-160 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

920-160 exam questions updated on regular basis

Same type as the certification exams, 920-160 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 920-160 exam demo before you decide to buy it in Test-Inside.com.

Exam : NORTEL 920-160

Title : nncss-communication server(cs)1000 RIs.4.0 Hardware I&M

1. In a CS 1000M RIs. 4.0 installation, installing the four-feed PDU (NT4N49AA) is a two step process. What is the first step?

- A. Remove the air intake grill.
- B. Test the resistance on the ground.
- C. Install the protective/safety ground.
- D. Connect power from the power plant to the PDU.

Answer: C

2. When installing an AC power supply in a CS 1000S RIs 4.0 system, according to the procedure for testing ground, what should be the resistance measure?

- A. less than 1 ohm
- B. less than 0.25 ohms
- C. direct short with NO resistance
- D. more than 0.25 ohms but NOT exceeding 0.5 ohms

Answer: B

3. Which is the correct procedure for installing a Logic Return Wire on a CS 1000M RIs 4.0 large system?

- A. Connect a #6 AWG wire from the ground source in the service panel to a ground lug on the pedestal.
- B. Connect a #8 AWG wire from the ground source in the service panel to a ground lug on the pedestal.
- C. Starting at the LRE, connect a #8 AWG wire and route it to the column and up or down the I/O channel area, as appropriate. Then route the wire through the conduit hole in the pedestal to the LRTN on the field wiring block.
- D. Starting at the LRE, connect a #6 AWG wire and route it to the column and up or down the I/O channel area, as appropriate. Then route the wire through the conduit hole in the pedestal to the LRTN on the field wiring block.

Answer: D

4. After installing the grounding block according to the grounding cabinets or chassis procedure, which task must be performed before power is applied?

- A. Test the ground.
- B. Connect the power cord and power up.
- C. Turn on the circuit breaker to reserve power (battery backup).
- D. Place a DO NOT DISCONNECT tag on the ground wire at the service panel.

Answer: A

5. In an AC powered single-column CS 1000M RIs. 0 large system, how is the personal hazard ground wiring routed?

- A. Connect a #6 AWG wire from the ground source in the service panel to a ground lug on the pedestal.
- B. Connect a #8 AWG wire from the ground source in the service panel to a ground lug on the pedestal.
- C. It is routed from the ground source in the service panel to the ground lug on the closet column. Then daisy chain #6 AWG ground wires from It is routed from the ground source in the service panel to the ground lug on the closet column. Then daisy chain #6 AWG ground wires from one pedestal to the next.
- D. It is routed from the ground source in the service panel to the ground lug on the closet column. Then daisy chain #8 AWG ground wires from It is routed from the ground source in the service panel to the ground lug on the closet column. Then daisy chain #8 AWG ground wires from one pedestal to the next.

Answer: A
