

922-109 Other Nortel Certification

Nortel Communications Server 1000 RIs.6.0 BARS/NARS

Practice Exam: 922-109 Exams

Exam Number/Code: 922-109

Exam Name: Communications Server 1000 RIs.6.0 BARS/NARS

Questions and Answers: 45 Q&As

([Other Nortel Certification](#))

Exam : [922-109](#)

"Communications Server 1000 RIs.6.0 BARS/NARS", also known as 922-109 exam, is a Nortel certification. With the complete collection of questions and answers, TestInside has assembled to take you through 45 Q&As to your 922-109 Exam preparation. In the 922-109 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Quality and Value for the 922-109 Exam TestInside Practice Exams for Nortel **Other Nortel Certification** Certification 922-109 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 922-109 Exam.

922-109 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Other Nortel Certification product experts, included the current newest 922-109 examination questions.

3. 100% Guarantee to Pass Your Other Nortel Certification exam and get your Other Nortel Certification Certification. If you do not pass the Nortel Certification 922-109 exam (Communications Server 1000 RIs.6.0 BARS/NARS) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 922-109 Q&A ensure you pass the exam at your first try.

TestInside professional provide Other Nortel Certification 922-109 the newest Q&A, completely covers 922-109 test original topic. With our complete Other Nortel Certification resources, you will minimize your Other Nortel Certification cost and be ready to pass your 922-109 tests on Your First Try, 100% Money Back Guarantee included!

[Nortel 922-109](#) Test belongs to one of the Other Nortel Certification certified test, if needs to obtain the Other Nortel Certification certificate, you also need to participate in other related test, the details you may visit the [Other Nortel Certification](#) certified topic, in there, you will see all related Other Nortel Certification certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 922-109 exam

922-109 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

922-109 exam questions updated on regular basis

Same type as the certification exams, 922-109 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 922-109 exam demo before you decide to buy it in Test-Inside.com.

Exam : Nortel 922-109

Title : Communications Server 1000 Rls. 6.0 BARS/NARS

1. Click on the Exhibit button.

Given the customer Route List Index shown in the exhibit, what is the first expensive route that a call placed on that RLI could take?

- A. Entry 0
- B. Entry 1
- C. Entry 2
- D. Entry 3

Answer: C

2. SIP connectivity, or SIP trunking, provides a direct media path (trunk interface) between domains.

Which type of servers do SIP Servers consist of?

- A. Proxy Server, Redirect Server and Registrar Server
- B. Converged Desktop Service (CDS), Multimedia Communication Server (MCS), and Office Communications Server (OCS)
- C. SIP User Agent, SIP Signaling Gateway, and SIP Trunk Gateway
- D. Microsoft LCS 2500, Microsoft OCS 2007, and IBM Lotus Notes

Answer: A

3. Click on the Exhibit button.

An employee at a company is placing a call to telephone number 214-774-3299. The employee, believing this is a toll call, dials 9-1-214-774-3299. However, this call is a local call.

Access Code 1 = 9

The Central Office utilizes a 7-digit dialing plan.

Give the DMI indexes programmed into this Communication Server 1000 shown in the exhibit, which DMI would be used to modify the dialed digits to output the correct digits to the Central Office?

- A. DMI Table 1
- B. DMI Table 2
- C. DMI Table 3
- D. DMI Table 4

Answer: B

4. Which functionality do TIE trunks provide?

- A. connects a telephone companies' central office and the PBX of a customer
- B. connects two different PBXs, whether in the same building or further away
- C. allows an outside caller to dial a station on a PBX directly
- D. provide incoming or outgoing service only, and not a combination of incoming/outgoing connections

Answer: B

5. In an IP Peer Networking environment on the Communication Server (CS) 1000, what functionality does the Network Routing Service (NRS) provide?

- A. replaces the basic networking parameters defined in BARS/NARS
- B. provides transcoding functionality for IP to TDM and TDM to IP calls

- C. centralized management of a single network dialing plan for SIP, H.323 and mixed SIP/H.323 networks
- D. synchronizes system configuration and database between Call Server and the Signaling Server

Answer: C

6. Integrated Services Digital Network (ISDN) uses international standards defined by ITU-T, an advisory committee under the ITU, to provide recommendations for global standards. It transmits voice, data and video communications as well as telephone signaling information, using internationally approved protocols to provide faster, economical and high QoS services.

What is ISDN divided into?

- A. Central Office Trunks (COT) and Direct Inward Dial (DID) Trunks
- B. Foreign Exchange (FX) and Wide Area Telephone Service (WATS) trunks
- C. Basic Rate Interface (BRI) and Primary Rate Interface (PRI)
- D. H.323 and SIP media paths

Answer: C

7. Click on the Exhibit button.

Before any other tables can be provisioned, which settings must have been provisioned in the ESN Data Block?

- A. Maximum parameters, including Maximum number of Digit Manipulation Tables (MXDM), Maximum number of Route Lists (MXRL), Maximum number of Supplemental Digit restriction blocks (MXSD) and Maximum number of Steering Codes (MXSC)
- B. NARS/BARS Access Code 1 (AC1) and NARS/BARS Access Code 2 (AC2)
- C. NCOS Map (NMAP)
- D. Time of Day Schedules (TODS) and Routing Controls (RTCL)

Answer: A

8. Click on the Exhibit button.

A customer's dialing requirements, listed below, require that all station users assigned an NCOS of 3 and Class of Service of Conditionally Toll Denied (CTD) be able to place toll calls from the United States to Australia.

Australia Country Code: 61

NCOS of 3 has an FRL of 3

Expensive Routers are not being used

With reference to the exhibit, which table will allow all station users to be able to place these toll calls?

- A. Provisioning Table A
- B. Provisioning Table B
- C. Provisioning Table C
- D. Provisioning Table D

Answer: B

9. Time-Division Multiplexing (TDM) uses trunks as a single or multi-channel telephone transmission channel with wide bandwidth to establish connections between switching systems and distribution points, or between two different types of switching systems.

Which type of transmission do TDM connections, or circuits, transmit, receive, or combine transmissions/receives of?

- A. SIP and H.323 Transmissions Only
- B. Both Voice and Data Transmissions
- C. Data Only Transmissions
- D. Voice Only Transmissions

Answer: B

10. The Communication Server (CS) 1000 VoIP network architecture uses a Gatekeeper.

Which function does the CS 1000 Gatekeeper provide?

- A. Receives call setup requests.
- B. Converts one media stream to another, such as voice packets to analog.
- C. Functions as a server and client to make requests on behalf of other clients.

D. Performs address translation and admission control.

Answer: D
